SUMMARY

Full Stack Engineer with 3.5+ years of experience building scalable web applications with Laravel, Vue.js, and MySQL. Experienced in AI-powered features (LLM integrations, speech-to-text pipelines), REST APIs, third-party integrations, and centralized authentication across multi-tenant architectures. Strong in production debugging, root-cause analysis, and shipping reliable software.

EXPERIENCE

Full Stack Engineer

Jul 2026 – Present

Remunance (Client: Purely Energy – UK Energy Brokerage)

Chennai, India

- Re-architected the central authentication layer serving 3+ applications (CRM, customer website, admin panel) to embed granular permissions in JWT tokens, propagating permission changes in real time and eliminating manual re-seeding.
- Integrated RingCentral telephony with an OpenAI Whisper speech-to-text pipeline to auto-transcribe sales calls, and implemented local speaker diarization to attribute dialogue between agents and customers.
- Built an LLM-powered call intelligence feature generating call summaries, extracting key details, and detecting scheduled callbacks – auto-creating events via an in-house calendar integration.
- Developed contract and price-request workflows for electricity meters, handling supplier-to-customer mediation logic.
- Built a partner invitation and onboarding flow plus reporting dashboards surfacing supplier deal-win performance.
- Redesigned core application pages to improve information hierarchy, and resolved production defects (including soft-delete issues) to improve stability.

Software Engineer

Sept 2024 – Apr 2026

Appfoster Innovations

Greater Noida, India

- Co-led CloudHR as the engineer solely in charge of development, owning architecture, schema design, and LLM-based feature delivery end-to-end.
- Automated 50+ monthly HR letters, reducing document preparation time by 80%.
- Built centralized mailing system, cutting HR communication turnaround by 60%.
- Built attendance and geo-fencing systems used by 500+ employees across multiple organizations.
- Automated leave allocation and holiday management workflows, eliminating manual assignments.
- Built payroll deduction workflows supporting TDS, PF, PT, and statutory compliance requirements.
- Integrated DSCO and Shipping Easy, doubling order fulfillment speed.
- Optimized 30+ API endpoints through backend query optimization, cutting average response times from 2s to under 500ms.
- Directed development for a 4-member team, assigning tasks to juniors and reviewing and testing 100+ pull requests.

Associate Software Engineer

Mar 2023 – Aug 2024

Appfoster Innovations

Greater Noida, India

- Delivered 50+ Vue.js components and 100+ REST APIs across leave, attendance, payroll, and employee management modules.
- Built gaming backend with Stripe subscriptions, improving payment reliability.
- Developed admin panel for game content and user interaction management.

PROJECTS

CloudHR – Multi-Tenant HRMS Platform

- Multi-tenant HRMS handling onboarding, leave, attendance, and payroll, with automated HR document generation via a dynamic template engine.

Chewy Middleware – Order Processing System

- Middleware syncing orders, inventory, and returns in real time between DSCO and Shipping Easy, doubling processing speed.

TECHNICAL SKILLS

Languages: PHP, JavaScript, Python, SQL

Frameworks & Libraries: Laravel, Vue.js, React, Tailwind CSS, Bootstrap, PHPUnit

Databases: MySQL, PostgreSQL, MongoDB, SQLite

AI & Integrations: LLM Integrations, OpenAI Whisper (Speech-to-Text), Speaker Diarization, RingCentral, Stripe, Firebase (FCM)

Tools & Platforms: Git, GitHub, GitHub Actions, Docker, Postman, Figma

Core Skills: REST API Development, Authentication & Authorization (JWT/SSO), Multi-Tenant & Multi-Application Architecture, Queue Jobs, Performance Optimization, State Management (Pinia)

EDUCATION

Dr. A.P.J Abdul Kalam Technical University

B.Tech, Information Technology

Uttar Pradesh, India

2019 – 2023
